# Lumen Learning Course List

January 2018 Edition

Lumen Learning uses [open educational resources \(OER\)](#) to provide affordable course materials that improve learning and replace expensive textbooks in high-enrollment college courses.

With Lumen courses, faculty members can be confident in the quality and completeness of OER course materials. These courses curate the best available OER aligned with learning outcomes. Typical content includes text, video, interactives, sample assignments and assessments, all integrating seamlessly into your campus learning management system (LMS).

## Flexible Choices in OER Courses

Lumen offers three types of digital courseware packages, each with unique tools wrapped around the OER content. You can select a package that best supports the learning experience you want to offer students. Use [this form](#) if you'd like to adopt a Lumen course.

### [Waymaker Personalized Learning Courses](#)

Waymaker courses help students exercise their metacognitive muscles with personalized study plans and interactive activities to practice and apply learning. Research shows Waymaker's data-driven learning design and messaging tools can increase student engagement, persistence, and completion rates.

### [Online Homework Manager \(OHM\) Courses](#)

OHM is a flexible math homework engine with instructional text and video, algorithmically-generated assessments, machine grading, and immediate feedback for students. OHM courses include static and/or editable text options.

### [Candela Courses](#)

Candela courses provide curated OER in e-book format. Full edit privileges allow course designers to shape the content to fit their learning outcomes, term length, students' needs, and so forth.

## Highly Recommended Courses

Highly recommended courses provide the smoothest transition for faculty members shifting away from traditional publishers' materials. They reflect significant investment in learning design, including complete OER content and assessments aligned with learning outcomes. Lumen actively updates these courses with enhancements aimed at improving learning, using input from subject matter experts, teaching faculty, and/or learning data analysis.

Discipline	Course	Waymaker	Candela	OHM

## Community Courses

In addition to the courses listed above, a variety of community-developed OER courses are also available in the Lumen Platform. While some are well-developed and complete, others may benefit from additional review and contributions. Visit this web page to find Community Courses: [lumenlearning.com/community-courses](https://lumenlearning.com/community-courses)

Lumen provides technical and platform support to adopt Community Courses with the convenience of the Lumen Platform and the LMS integration it provides. Lumen does not actively maintain or take responsibility for the course content itself. Course materials are provided as-is, and adopters have the freedom to customize and update the content as desired.

## Affordable Pricing & Payment Options

Lumen's affordable course support fees are \$25/enrolled student for Waymaker and OHM courses. Candela and non-OHM Community Courses are \$10/enrolled student.

Lumen offers [flexible payment options](#) to fit administrative and funding processes. These include per student course support fees, annualized pricing per institution, and student payment via the bookstore (for Waymaker and OHM courses only).
